RAWLINGS FOOTBALLS

The new Rawlings R2™ football delivers the details demanded from a top-level game ball. This rugged game football features deep-pebbled, center-cut Horween leather with an enhanced tack formulation, and Rawlings proven Soft Touch Technology™. When you add the high-tack composite stripes and R-Grip™ lace, this ball offers the best grip in the industry. Rawlings' re-engineered Aerial™ pattern offers the smallest-allowable pattern, perfectly suited for quarterbacks gripping and slinging the ball, running backs and wide receivers catching and securing the ball on breakout plays, and holders and punters on special teams. The R2 football will allow you to dominate on the gridiron in every phase of the game.

R2FB-B OFFICIAL SIZE

- Pack: Bulk 12
- Meets NFHS® and NCAA® specifications

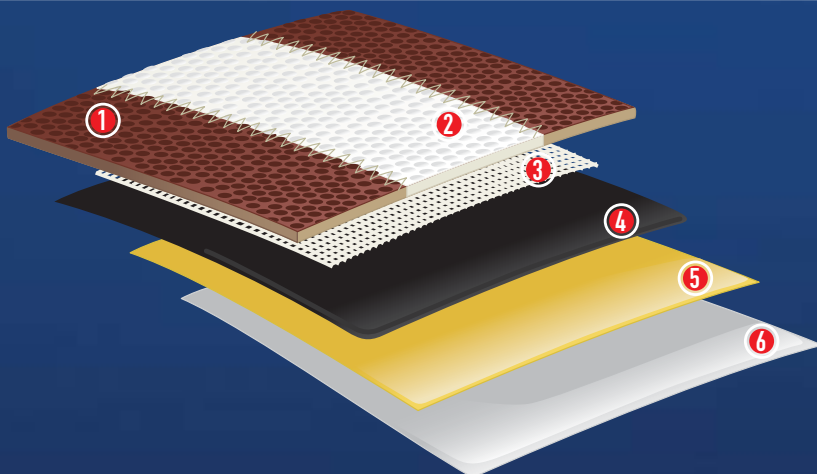

MSRP: \$110.00

FEATURES

- Pattern: New Aerial™ pattern is the smallest allowable pattern, engineered to be narrow where quarterbacks grip the ball
- Stripe: Durable, high-tack pebbled PU Rawlings R-Grip™ composite stripes
- Leather: Enhanced tack, center-cut, deep-pebbled Horween leather for maximum grip and durability
- Lace: Rawlings R-Grip™ rubberized lace
- Construction: Soft Touch Technology™ and its unique 3-ply laminated lining offers better control and a sure grip

R2 CONSTRUCTION

- (1) Enhanced tack, center-cut, deep-pebbled Horween leather for maximum grip and durability.
- (2) Durable, high-tack pebbled PU Rawlings R-Grip™ composite stripes.
- (3) Extra carcass layer to keep moisture out.
- (4) Soft Touch Technology™ and its unique 3-ply laminated lining offers better control and a sure grip.
- (5) Durable carcass optimized for the new Aerial™ pattern.
- (6) 4-Ply TPU bladder forms a better shape, holds air in and locks moisture out.

The new and improved 2015 Rawlings ST5™ football has all the features of a classic Rawlings game ball. Starting with its deep-pebbled, center-cut Horween leather with an enhanced tack formulation and Rawlings proven Soft Touch Technology™, the enhanced ST5 ball also features our re-engineered Aerial™ design to offer the smallest-allowable pattern. The ST5's new durable painted stripe is 67% more durable than standard painted stripes in the market today. Add in Rawlings R-Grip™ lace, and this ball will allow you optimum control play after play.

FEATURES

- Pattern: New Aerial™ pattern is the smallest allowable pattern, engineered to be narrow where quarterbacks grip the ball.
- Stripe: New painted stripes are 67% more durable than the industry standard.
- Leather: Enhanced tack, center-cut, deep-pebbled Horween leather for maximum grip and durability
- Lace: Rawlings R-Grip™ rubberized lace.
- Construction: Soft Touch Technology™ and its unique 3-ply laminated lining offers better control and a sure grip

PRO5™

The new-and-improved 2015 PRO5™ football is a classic pro-style ball. Built using deep-pebbled, center-cut Horween leather with an enhanced tack formulation, the new PRO5 ball also features Rawlings' re-engineered Aerial™ pattern to offer the smallest-allowable pattern in a pro construction for a traditional feel. The PRO5's new durable painted stripe is 67% more durable than standard painted stripes in the market today.

FEATURES

- Pattern: New Aerial™ pattern is the smallest-allowable pattern, engineered to be narrow where quarterbacks grip the ball.
- Stripe: New painted stripes are 67% more durable than the industry standard
- Leather: Enhanced tack, center-cut, deep-pebbled Horween leather for maximum grip and durability
- Lace: Rawlings R-Grip™ rubberized lace
- Construction: Pro construction for a traditional, game day feel.

The ST5 COMP features our exclusive mottled composite leather for a leather game ball look and combined with Rawlings exclusive Soft Touch Technology, has grip that is second to none. Composite leather is quickly becoming a popular alternative because it offers superior grip with a softer feel than traditional leather.

FEATURES

- Composite Leather: Exclusive ST5[™] composite microfiber cover for maximum grip.
- Mottled color for a leather game football appearance.
- Rawlings R-Grip[™] rubberized lace
- Soft Touch Technology: Unique 3-Ply laminated lining offers better control and a sure grip
- Bladder: double wall, airtight bladder for excellent air retention
- NFHS[®] and NCAA[®] approved

RAWLINGS AC2™

This Advance AIA™ technology integrates Active Compression Cores into the padding system, which allows for performance at different impact levels and temperatures.

- Strategically placed for comprehensive coverage
- Lightweight design
- Combined in foam for performance at different impact levels
- Impact attenuation at different temperature ranges

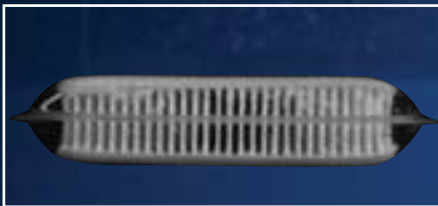

RAWLINGS AIA™ ACTIVE IMPACT ABSORPTION

- Strategically placed pad sets (●) to ensure comprehensive coverage
- Lightweight design
- An integrated network of communicating channels (●) designed to reduce weight and effectively disperse impact force

HOW RAWLINGS AIA™ WORKS

RAWLINGS AIA™ CUSHION AT NORMAL STATE

RAWLINGS AIA™ CUSHION DURING IMPACT

RAWLINGS AIA™ CUSHION TRANSFER OF FORCE VIA COMMUNICATING CHANNELS

RAWLINGS C3D™

This unique design allows the padding system to conform to the shell for a better fit on a player's head. The C3D also inflates against the shell so you do not lose surface contact when the liner is inflated.

- Customizable inflation liner
- Allows for desired fit
- Dual inflation

VS.

RAWLINGS C3™ CUSTOM COMFORT CUSHION

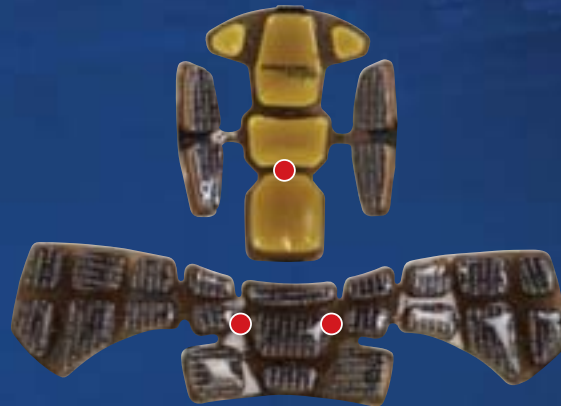

AIR PORT VALVES
Customized fit and comfort

- Customizable inflation liner
- Inflation ports allow for individual fit

AVAILABLE IN:

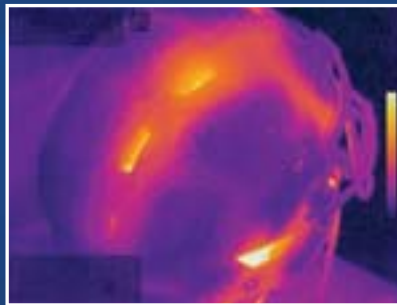

- Rawlings NRG Quantum™ Plus
- Rawlings NRG Quantum™
- Rawlings NRG Impulse™
- Rawlings NRG Momentum™ Plus

COMMUNICATING CHANNELS
Reduce weight and effectively disperse impact

RAWLINGS HEAT EXCHANGE™

- Padding system designed for temperature control
- Strategically placed vents create optimum air flow

RAWLINGS HEAT EXCHANGE™ VENTS:

Top vents help to move heated air away from player's head.

Back and side vents circulate cooler ambient air thus enhancing an overall cooling effect of the innovative design.

SIZING

HELMET SIZE	HAT SIZE	HEAD CIRCUMFERENCE
SMALL	6 - 6 1/2	19" - 20 3/8"
MEDIUM	6 1/2 - 7	20 3/8" - 22"
LARGE	7 - 7 1/2	22" - 23 1/2"
X-LARGE	7 1/2 - 8	23 1/2" - 25 1/8"

If measurement is between suggested helmet sizes, choose the smaller helmet size for fit test.

WARNING: NO HELMET CAN PREVENT ALL HEAD OR ANY NECK INJURIES A PLAYER MIGHT RECEIVE WHILE PARTICIPATING IN FOOTBALL.

Do not use this helmet or faceguard to butt, ram, or spear an opposing player. This is in violation of football rules and such case can result in severe head or neck injuries, paralysis or death to you and possible injury to your opponent. Contact in football may result in **CONCUSSION/BRAIN INJURY** which no helmet can prevent. Symptoms include: loss of consciousness or memory, dizziness, headache, nausea, or confusion. If you have symptoms, immediately stop playing and report them to your coach, trainer, doctor and parents. Do not return to a game or practice until all symptoms have resolved for an extended period of time and you have received written **MEDICAL CLEARANCE**. Ignoring this warning may lead to additional and more serious or fatal brain injury including potentially fatal second impact syndrome. No helmet system can protect you from serious brain and/or neck injuries including paralysis or death. To avoid these risks, do not engage in the sport of football.

WARNING: NO HELMET CAN PREVENT ALL HEAD OR ANY NECK INJURIES A PLAYER MIGHT RECEIVE WHILE PARTICIPATING IN FOOTBALL.

Do not use this helmet or faceguard to butt, ram, or spear an opposing player. This is in violation of football rules and such case can result in severe head or neck injuries, paralysis or death to you and possible injury to your opponent. Contact in football may result in CONCUSSION/BRAIN INJURY which no helmet can prevent. Symptoms include: loss of consciousness or memory, dizziness, headache, nausea, or confusion. If you have symptoms, immediately stop playing and report them to your coach, trainer, doctor and parents. Do not return to a game or practice until all symptoms have resolved for an extended period of time and you have received written MEDICAL CLEARANCE. Ignoring this warning may lead to additional and more serious or fatal brain injury including potentially fatal second impact syndrome. No helmet system can protect you from serious brain and/or neck injuries including paralysis or death. To avoid these risks, do not engage in the sport of football.

RAWLINGS HELMET STANDARD COLORS

Understanding the importance and uniqueness colors play in identifying teams on the field, to accurately meet your team's specific needs, Rawlings provides numerous colorway options covering a broad spectrum of colors and design treatments.

CUSTOM COLORS

Note: Helmet colors, as pictured here, may vary from the actual helmet colors. Contact Rawlings Customer Service or your Rawlings NRG Quantum™ football helmet dealer for actual color swatches or more information regarding Rawlings custom paint colors for football helmets. Also note, custom paint applications may incur extra costs. Custom paint fees, if applicable, will be determined during the custom paint order process. Additionally, painting of football helmets requires added lead time for order processing. Rawlings reserves the right to charge additional fees for matching a custom paint color from a submitted sample. When submitting sample helmets for custom paint match, send samples to:

No helmet system can protect you from serious brain and/or neck injuries including paralysis or death. To avoid these risks, do not engage in the sport of football.

RAWLINGS ADULT HELMET FIT GUIDE

A football helmet must fit properly in order to provide the protection for which it was designed. Improper fitting can result in serious injury or death to the player, and Rawlings disclaims any liability for the improper fitting of football helmets. Rawlings provides the following fitting guide to ensure that the recommended fitting procedures for Rawlings football helmets are understood and followed. Players must be made aware of the importance of the proper fit so they can achieve optimum performance of the Rawlings football helmet.

PRELIMINARY SIZING

Measure head circumference - Use a cloth tape measure and measure the player's head approximately 1" above the eyebrows around the widest part of the player's head. Next, select the appropriate helmet size range that most closely matches the head circumference measurement (see following size/circumference grid as a reference)

NRG QUANTUM PLUS SIZING

HELMET SIZE	HAT SIZE	HEAD CIRCUMFERENCE
SMALL	6 1/4 - 6 3/4	19 5/8" - 21 1/4"
MEDIUM	6 3/4 - 7 1/4	21 1/4" - 22 3/4"
LARGE	7 1/4 - 7 3/4	22 3/4" - 24 3/8"

NRG TACHYON, NRG QUANTUM & NRG IMPULSE SIZING

HELMET SIZE	HAT SIZE	HEAD CIRCUMFERENCE
SMALL	6 - 6 1/2	19" - 20 3/8"
MEDIUM	6 1/2 - 7	20 3/8" - 22"
LARGE	7 - 7 1/2	22" - 23 1/2"
X-LARGE	7 1/2 - 8	23 1/2" - 25 1/8"

The size chart is a reference guide only. It is to be used as a suggested starting point in determining proper fit of the helmet. Since every head is shaped differently, this size chart may not indicate the appropriate size for every player. It is important to consider feedback from the player balanced with the examination and inspection of the recommended fit guidelines found in this fit guide to determine the proper helmet fit on each player.

PUTTING ON THE HELMET

MOST IMPORTANTLY, BEFORE HELMET FITTING, MAKE SURE THE PLAYER READS AND UNDERSTANDS THE WARNING STICKERS ON HELMET. PLAYER MUST SECURE APPROPRIATE MEDICAL CLEARANCE PRIOR TO ENGAGING IN THE SPORT OF FOOTBALL.

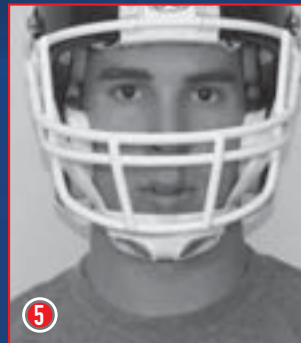

Ensure the helmet is the proper size - reference the size grid to the size sticker on the rear of the helmet shell.

Hold helmet with index fingers in ear holes and thumbs hooked over the bottom edge of the helmet nearest the jaw pads and pull the helmet on as shown in the accompanying photo.

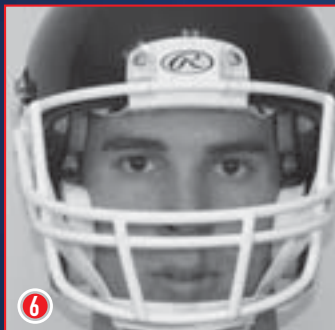

Pull helmet down over head into the worn position - make sure the player feels the top of the helmet crown with the top of his head.

Fasten the chin strap securely, using the mid-high snapped configuration.

- Lace the chin straps for the top of helmet snap posts underneath the top facemask bar.
- Buckle top of chin strap into the snaps above the ear holes on both sides of the helmet.
- Center the chin cup on the player's chin and adjust the buckles on the bottom straps so that the chin straps are of equal length on either side of the helmet and the chin cup is firmly fitted on the center of the player's chin.
- Fasten the bottom straps. When properly fitted, the helmet should feel comfortable and fit snugly.

After the helmet is pulled into position and the chin strap fastened, the proper fit would have the front top edge of the helmet, above the player's eyes, to be positioned approximately 1" above the player's eyebrows and the helmet ear hole centered over the player's ear.

ADJUSTING HELMET FIT

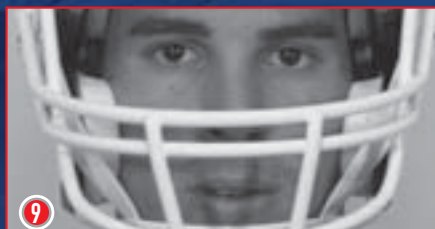

After the helmet is fitted, and chin strap buckled, if the spacing on the forehead is improper (i.e. the gap between the eyebrows and the helmet on the forehead is less than 1" and too low on the forehead or the helmet is too low and not centered properly over the ear hole), minor fit adjustments can be made by air inserted into the C3™ Crown Comfort liner. (Note: if the fit on the front of the helmet is such that the gap on the player's forehead is greater than 1", make sure that the C3 Crown Comfort liner is deflated before the helmet is put on).

Using the air pump, insert the needle into the inflation valve port located on top of the Rawlings helmet. Pump the bulb to insert air, one (1) to three (3) pumps is recommended. After each pump, check the fit spacing on the player's forehead and the ear hole as well as asking the player for feedback regarding the comfort / fit during this inflation adjustment. When done, the fit should be snug, but comfortable. (Note: it may be necessary to re-adjust the length of the chin strap after air adjustment of the C3 Crown Comfort liner. The chin strap fit needs to be secured snugly in the center of the player's chin, but it should not be overly tight).

PROPER USE OF THE INFLATION PUMP:

- Ensure inflation needle is properly fitted to the end of the inflation pump hose (Note: any standard inflation needle will work with a Rawlings helmet)
- Use glycerin to lubricate inflation needle (Note: do not use petroleum jelly or saliva as these will degrade the valve material)
- Apply glycerin to the inflation needle and insert the needle into the inflation valve
- Pump the inflation valve bulb to inflate (Note: recommended number of pumps is one (1) to three (3))
- To deflate, release the valve located on the air hose while the needle is inserted in the inflation valve
- Remove inflation needle from valve

Next, check the lateral fit of the helmet. The first step is to check the fit of the jaw pads. Properly fitted the jaw pads should fit snug and comfortably to the player's jaw. If there is a gap, between the pad and the jaw or the pad fit is too tight, Rawlings offers other jaw pad sizes to adjust this fit.

(Note: Rawlings standard jaw pad thickness is $\frac{7}{8}$ ", however these additional sizes are available: $\frac{5}{8}$ ", $1\frac{1}{8}$ ", or $1\frac{3}{8}$ ".)

Once the jaw pad fit is determined, check the side to side rotation of the head upon the player's head. Properly fitted, the skin of the forehead should move with the front pad - there should be no room for twisting of the helmet. During this fitting process, if additional lateral/rear fit adjustments are required, use the air pump to insert air into the inflation valve port located on the lower bottom of the rear of the Rawlings helmet. Insert the needle into the inflation valve port. Pump the bulb to insert air, one (1) to three (3) pumps is recommended. After each pump, check the helmet fit as well as ask the player regarding comfort/fit during this inflation adjustment.

(Note: if after this rear/lateral air adjustment exercise the helmet slips easily from side to side, try the next smaller sized helmet).

CHECKING FOR PROPER FIT

For the final fit check, regardless of any inflation adjustments, interlock the hands on top of the helmet and press down. The player should feel the pad pressure on the crown of his head and a secure snug fit in the forehead area. Should the player feel excessive pressure, or discomfort, upon his forehead check the inflation of the lateral/rear C3 inflation liner.

(Note: Should there be discomfort without inflation adjustments to the lateral/rear inflation port, the next larger helmet size may be needed.)

Properly fitted, the helmet should not slip from side to side and the helmet should not move independently of the head. Ask the player about the fit. It should fit snugly without being too tight and the helmet should move only as the player's head moves.

The Rawlings helmet should be checked on a regular basis to see that the inflation system is working correctly. Concerning proper fit, there are several variables to consider, e.g. weather conditions - hot or cold extremes, change in altitude, damage to the C3 liners, or to the inflation valves. Fit checks should be done on a regular schedule to determine whether the proper fit characteristics are being maintained.

WARNING: NO HELMET CAN PREVENT ALL HEAD OR ANY NECK INJURIES A PLAYER MIGHT RECEIVE WHILE PARTICIPATING IN FOOTBALL.

Do not use this helmet or faceguard to butt, ram, or spear an opposing player. This is in violation of football rules and such case can result in severe head or neck injuries, paralysis or death to you and possible injury to your opponent. Contact in football may result in CONCUSSION/BRAIN INJURY which no helmet can prevent. Symptoms include: loss of consciousness or memory, dizziness, headache, nausea, or confusion. If you have symptoms, immediately stop playing and report them to your coach, trainer, doctor and parents. Do not return to a game or practice until all symptoms have resolved for an extended period of time and you have received written MEDICAL CLEARANCE. Ignoring this warning may lead to additional and more serious or fatal brain injury including potentially fatal second impact syndrome. No helmet system can protect you from serious brain and/or neck injuries including paralysis or death. To avoid these risks, do not engage in the sport of football.

RAWLINGS YOUTH HELMET FIT GUIDE

The proper fit of the Rawlings NRG Momentum™ and Rawlings NRG Force™ football helmet is essential in providing the protection for which it is designed. Improper fitting can result in serious injury or death to the player, and Rawlings disclaims any liability for the improper fitting of football helmets. Rawlings provides the following NRG Momentum and NRG Force fitting guide to ensure that the recommended fitting procedures for Rawlings football helmets are understood and followed. Players must be made aware of the importance of the proper fit so they can achieve optimum performance of the Rawlings football helmet.

PRELIMINARY SIZING

Measure head circumference - Use a cloth tape measure and measure the player's head approximately 1" above the eyebrows around the widest part of the player's head. Next, select the appropriate helmet size range that most closely matches the head circumference measurement (see following size/circumference grid as a reference)

The size chart is a reference guide only. It is to be used as a suggested starting point in determining proper fit of the helmet. Since every head is shaped differently, this size chart may not indicate the appropriate size for every player. It is important to consider feedback from the player balanced with the examination and inspection of the recommended fit guidelines found in this fit guide to determine the proper helmet fit on each player.

PUTTING ON THE HELMET

MOST IMPORTANTLY, BEFORE HELMET FITTING, MAKE SURE THE PLAYER READS AND UNDERSTANDS THE WARNING STICKERS ON HELMET. PLAYER MUST SECURE APPROPRIATE MEDICAL CLEARANCE PRIOR TO ENGAGING IN THE SPORT OF FOOTBALL.

Ensure the helmet is the proper size - reference the size grid to the size sticker on the rear of the helmet shell.

Hold helmet with index fingers in ear holes and thumbs hooked over the bottom edge of the helmet nearest the jaw pads.

Pull helmet down over head into the worn position - make sure the player feels the top of the helmet crown with the top of his head.

Fasten the chin strap securely, using the mid-high snapped configuration.

- Lace chin straps underneath the top facemask bar.
- Buckle top of the chin strap into the snaps above the ear holes on either side of the helmet.
- Center the chin cup on the player's chin and adjust the buckles on the bottom straps so that the chin straps are of equal length on either side of the helmet and the chin cup is firmly fitted on the chin.
- Fasten the bottom straps. When properly fitted, the helmet should feel comfortable and fit snugly.

After fastening the chin strap into place, as a final size reference, check the ear hole alignment. A properly fit helmet should be centered over the player's ear.

Next, check the lateral fit of the helmet. The first step is to check the fit of the jaw pads. Properly fitted, the jaw pads should be snug to the player's jaw. If there is a gap, or the pad fit is too tight, Rawlings offers other jaw pad sizes to adjust this fit. (Note: Rawlings standard jaw pad thickness is 1 1/8", however these additional sizes are available: 5/8", 7/8", 1 3/8")

Once the jaw pad fit is determined, check the front spacing of the front edge of the helmet in the forehead area. A properly fitting helmet should have an approximate 1" spacing between the edge of the helmet and the top of the player's eyebrows.

Finally, check the side to side rotation of the helmet upon the player's head. Properly fitted, the skin of the forehead should move with the front pad - there should be no room for twisting of the helmet. The helmet should not slip from side to side and the helmet should not move independently of the head. Ask the player about the fit. It should fit snugly without being too tight and the helmet should move only as the player's head moves.

PRO/COLLEGIATE/VARSITY

Advanced Impact Management System™. Rawlings' most technologically advanced line of shoulder pads featuring our exclusive PORON® XRD™ protection technology. LOW-PROFILE DESIGN

PRO/COLLEGIATE/VARSITY

The Rawlings SRG Siegel™ shoulder pad was developed using key design features provided by Rawlings' experience at the NFL level. Today's top players demand lower pad profiles, lighter pads, and combinations of performance impact attenuation systems. The SRG Siegel series combines all of these elements in a pad series designed specifically for the performance demands of the elite player.

LOW-PROFILE DESIGN

COLLEGIATE/VARSITY

Rawlings' lightweight line of Collegiate/Varsity shoulder pads featuring a padded arch construction to create a low-profile design with maximum comfort.

LOW-PROFILE DESIGN

COLLEGIATE/VARSITY

Performance Collegiate/Varsity line features Rawlings' exclusive Air Management II™ protection technology that utilizes a 3/4" urethane foam heat sealed to a lightweight nylon that disperses the impact throughout the entire shoulder pad. In 2013, this pad is enhanced with closed front for improved force attenuation.

LOW-PROFILE DESIGN

VARSITY

Rawlings' popular Varsity line combines dual density cushioning technology sandwiching traditional EVA foam for good protection with open cell foam for increased comfort

LOW-PROFILE DESIGN

YOUTH PROTECTIVE LINE-UP

YOUTH

This pad provides everything you need for the elite youth player. This lightweight pad has maximum mobility and a low-profile design, while providing premiere protection. Add the customized clavicle pads, and this pad has all the features you need to perform your best.

LOW-PROFILE DESIGN

IGNITION™

YOUTH

This youth pad series offers excellent protection in a padding system designed for the youth level of play. With models available in single and double "hook-up" styles, all featuring cantilever style designs with clavicle build-ups, this pad series is designed for all positions. Titan Jr series offers front and back padding extensions further complementing this pad's value.

LOW-PROFILE DESIGN

TITAN JUNIOR™

YOUTH

Rawlings' performance youth line delivers exceptional quality and protection for introductory players. Featuring a low-profile design and protective components, this pad is designed with the youth player in mind.

LOW-PROFILE DESIGN

MOMENTUM™

FLAT PADS MUST BE WORN TIGHT TO FUNCTION PROPERLY.

WARNING: These pieces of protective equipment are designed to minimize the possibility of injury to the specific body parts which they cover. Use of this equipment does not guarantee that you will be protected from serious, disabling or permanent injury while playing football. Any modification or alteration without permission of the manufacturer could reduce the protective capacity. Playing football or strenuous exercise while wearing this equipment in hot weather could result in heat exhaustion, heat stroke or even death.

NARROW ARCHES ALLOW ARMS FULL MOBILITY

Streamlined Epaulets and Shoulder Caps allow for full range of motion

SRG AIMS™ (Advanced Impact Management System), maximizes performance by utilizing innovative technologies to match the demands of today's athlete: lightweight, mobility, protection and comfort.

The top of the strip pad has a layer of exposed PORON® XRD™ that covers the entire shoulder.

1 MOBILITY TECHNOLOGY

The dual curve design of the epaulet and shoulder cap provides an extremely low-profile design over the shoulder. The dual strap attachment creates a synchronized shoulder action system to increase arm mobility.

2 ARCH TECHNOLOGY

Vertical corrugations in the low-profile arch design allow for the use of lighter, more flexible materials, to provide maximum speed and mobility while maintaining strength and durability.

3 CORE PROTECTION TECHNOLOGY

Air Management strip padding encapsulates open cell foam with our exclusive PORON® XRD™ extreme protection foam housed within air tight nylon for maximum lightweight impact dispersion. Add in PORON® XRD™, and the SRG AIMS pad is the most protective shoulder pad on the gridiron.

4 COMFORT TECHNOLOGY

Rawlings anti-microbial, moisture-wicking Pro Dri Plus™ fabric works to pull perspiration away from your body and keep you cool and dry.

FLAT PADS MUST BE WORN TIGHT TO FUNCTION PROPERLY.

WARNING: These pieces of protective equipment are designed to minimize the possibility of injury to the specific body parts which they cover. Use of this equipment does not guarantee that you will be protected from serious, disabling or permanent injury while playing football. Any modification or alteration without permission of the manufacturer could reduce the protective capacity. Playing football or strenuous exercise while wearing this equipment in hot weather could result in heat exhaustion, heat stroke or even death.

To see PORON® XRD™ in action, visit www.youtube.com/Rawlings1887 and search "The Power of PORON® XRD™"

Wearable protection works with you - lightweight, comfortable and breathable. A game-changing material empowers you to concentrate on the next play, not the last hit.

FEEL THE INTENSITY OF THE SPORT...

With PORON® XRD™ material, protection is there when you need it. On impact, the PORON® XRD™ high performance molecules create a unique protective shield that can absorb up to 90% of the most intense force* - hit after hit

NOT THE IMPACT

* As measured according to ASTM-F1614-C

RAWLINGS ADULT PROTECTIVE SHOULDER PADS

Developed in collaboration with professional football equipment managers, the Rawlings SRG AIMS™ shoulder pad line is the most technically-advanced pad on the market today. Its lightweight, low-profile design allows for ultimate visibility and mobility while providing maximum protection for today's elite athletes.

- 11.5% lighter than previous series
- 7% improved profile vs. previous series

FEATURES

The Rawlings SRG Spartan™ shoulder pad series gives a new look to traditional pads, while providing the increased range of motion and flexibility players demand. This series uses a low-profile flat pad construction for excellent field vision and mobility. SRG Spartan shoulder pads also utilize Rawlings Pro Dri® technology on the interior of the pad. The Pro Dri anti-microbial, moisture-wicking fabric provides an extremely comfortable feel, while pulling perspiration away from the body

- 9.8% lighter than previous series
- 9.2% improved profile vs. previous series

FEATURES

- 1) Durable polyester mesh fabric provides a superior lightweight outer covering.
- 2) Perforated EVA foam allows for air dispersion upon contact and provides added impact absorption.
- 3) Air impermeable material forces air around the pad's interior to increase air dispersion upon contact for improved impact absorption.
- 4) Strong polyethylene interior arch serves as the load spreader upon impact and providing a reduction in weight, while improving flexibility.
- 5) Open cell foam serves as the final layer of protection and provides a soft, comfortable fit.
- 6) Pro Dri Plus™ anti-microbial moisture-wicking fabric interior is soft to the touch, provides maximum heat and moisture transfer, and improves air circulation.

SPTNSK

- Quarterback, Receiver, Defensive Back, Kicker
- Flat pad construction for skill positions
- Low-profile design for excellent mobility and field vision
- Customizable foam clavicle pads for personalized fit

PROTECTIVE FITTING GUIDE

1. Fully extend arms above head. Take note of any abnormal movements or expressions of pain during this test which could indicate potential or existing shoulder problems. If any evidence of pain is felt, a physician must be consulted prior to continuing.

2. Stand erect with arms at sides. Measure across the back beginning where you can feel the shoulder bone on one side, to where the bone ends on the opposite side. Round up to the next half-inch and record dimension. Measurement must be checked at least once a year or upon noticeable increase in weight or body size.

3. Once the shoulder measurement has been determined, select the pad by matching the correct size to the shoulder measurement.

4. Place the shoulder pad on the shoulders and verify that the edge of the strip pad lines up with the measuring point on the shoulder. After verifying edge location, adjust elastic body straps to modest tension, so the shoulder pad stays in place during movement.

5. Check to see that the neck opening is not too tight - resulting in pinching, or too loose - exposing the clavicle.

6. Check to ensure adequate coverage of both the sternum and pectoral muscles in front.

7. Check to ensure the scapula (shoulder blade) is covered by the shoulder pad and not exposed in back. Should the shoulder blade area be exposed, we recommend wearing the next larger size.

ALL NEOPRENE WRAPS OFFER ADJUSTABLE COMPRESSION FOR:

Additional support • Provides pain relief from common sports injuries • Keeps brace secure during active use • Customized fit enhanced injury protection and prevention

RG437

NEOPRENE OPEN KNEE WITH COMPRESSION STRAPS

- Reinforced open patella limits swelling and relieves pressure
- Contoured design for optimal fit and joint protection
- Retains therapeutic heat to help soothe muscles and maintain flexibility
- Extra thick neoprene construction for added support and protection
- Lining wicks away moisture from skin
- Anti-bacterial biocide integrated to assist in reducing the growth of odor causing bacteria

Sizes: Adult - One-size-fits-most
Color: Black

RG441

NEOPRENE CLOSED KNEE WITH COMPRESSION STRAPS

- Provides comfort support to weak or injured knees
- Contoured design for optimal fit and joint protection
- Retains therapeutic heat to help soothe muscles and maintain flexibility
- Extra thick neoprene construction for added support and protection
- Lining wicks away moisture from skin
- Anti-bacterial biocide integrated to assist in reducing the growth of odor causing bacteria

Sizes: Adult - One-size-fits-most
Color: Black

RG525

KNEE SUPPORT, ELASTIC MULTI-COMPRESSION

- Various knit densities help to promote blood flow
- Silicone dots at top help keep knee in place
- Extra flex behind knee for range of motion and comfort
- Extra support behind and below patella for optimal protection
- Extremely thin profile to prevent interference with athletics or clothing and breathable

Sizes: Adult S/M, L/XL
Measurements Around Knee: 13 1/2" - 16" (Adult S/M),
16 1/2" - 19" (Adult L/XL)

Color: Black/Gray or Blue/White

RG695 SLIM-FIT KNEE PAD

- Multi-sport designed for volleyball, softball, wrestling, basketball, and football
- Impact absorbing design with additional contoured side padding protection
- Made from moisture wicking materials

Size: Youth, Adult
Colors: Black, White

RG439

NEOPRENE ANKLE WITH COMPRESSION STRAPS

- Relieves pain through constant pressure of ankle
- Open heel design forms to fit ankle providing reliable support
- Retains therapeutic heat to help keep muscle and joint flexibility
- Extra thick neoprene construction for added support and protection
- Lining wicks away moisture from skin
- Anti-bacterial biocide integrated to assist in reducing the growth of odor causing bacteria

Sizes: Adult - One-size-fits-most
Color: Black

RG519 LACE UP ANKLE BRACE

- Two metal stays on each side for additional lateral support
- Made of vinyl for strength and durability
- Provides excellent support for sprained or weak ankles while helping to prevent further injuries

Fits Men's Shoe Sizes S: 7 1/2-9, M: 9 1/2-11, L: 11 1/2-13, XL: 13+

ISO

Be stronger. Be unstoppable. Be the best. The ISO series features premium fabrics that are engineered for extreme performance and heavy impact, allowing players to withstand relentless hours on the field. They were designed with varsity and collegiate athletes in mind, so players and jerseys alike can endure the hardest hits and toughest plays. We're not only revolutionizing our fabrics, but athletes' performance as well.

MATCHING COLORS:

There is no known process which can positively regulate the final results when cotton, polyester or nylon yarns or cloth are dyed in both yarns and fabrics. Even though the finest dyes are used, each lot may absorb the color in a different manner and vary in shading when finished. Every possible effort is made to match colors as closely as the peculiarities in dyes and dye action will permit, but the situation is not

controllable. All orders are handled by us with the understanding that the purchaser realizes these conditions and accepts the responsibility for any variations within standard tolerances. Fabric of 100% polyester or polyester blends in dark shades contain dyes that may tint light colors of Perma-Print® ink. Rawlings® will not assume responsibility should this occur.

NOTES:

1. Perma-Print® is a screen printing process unique to Rawlings® and Worth®.
2. Flexible Plastisol Printing adheres to most knitted garments, will not crack or peel, and stretches with the garment.
3. Perma-Print® lettering is washable. Do not dry clean or iron.
4. Rawlings® and Worth® carry several stock designs, however, if you do not find one that meets your needs, our artists will design one to your specifications for a nominal pattern charge. Art is kept on file for 2 years under the invoice number of the order. After this time the art is destroyed. All re-orders received without the original invoice number will be charged as a new design. If you change garments, locations, colors, size, etc. the artwork may have to be redone.
5. Rawlings® and Worth® cannot guarantee any screening performed by a dealer's own screening operation.
6. Finished digital artwork in EPS, vector format must accompany any order for non-standard or new designs.
7. Fabric of 100% polyester or polyester blends in dark shades contain dyes that may tint light colors of Perma-Print® ink. Rawlings® and Worth® will not assume responsibility for this happening.
8. Screenprinting may cause the garment to shrink up to 5%.

NOTES: TAIL OPTIONS

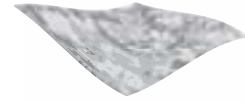

PERMA-PRINT® AND VAPORFUSION™ STOCK MASCOTS

VAPOR FUSION

PERMA PRINT

PPMAS1 • One Color Mascot PPMAS2 • Two Color Mascot

Stock Mascots offered in 1 or 2 colors. Must be ordered as pictured with the black portion as one color and the white as the other color. If design or color specifications are altered, the art is no longer stock and will be considered custom.

 A1 EAGLE 1	 H2 BIRD 8	 J2 BIRD 10	 N2 BIRD 14	 K3 BIRD 18	 G8 CARDINAL 1

* "Football" in banner is only as an example. 7 on 7 Football logo comes standard with Full Block letters in banner. Must specify letters to be used or blank banner.

These drawings are for illustration purposes only. Rawlings® expressly disclaims any rights in these mascot drawings. The customer is solely responsible for obtaining permission or a license to use proprietary marks.

FOOTBALL SLEEVE STRIPING PATTERNS

PPSS1 • One Color Perma-Print® Sleeve Stripes PPSS2 • Two Color Perma-Print® Sleeve Stripes
 *When ordering sleeve stripes, specify colors from sleeve end to shoulder

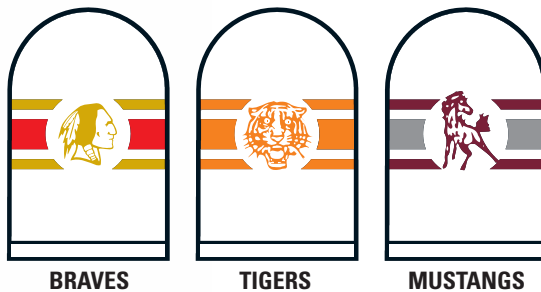

Sleeve stripe patterns showing red and blue stripes in which the red and blue colors do not touch, are also available as a one color sleeve stripe pattern. White indicates fabric showing through. For youth sizes medium and smaller, Rawlings cannot guarantee the fit of sleeve stripe patterns greater than 3 3/4" tall. If size adjustments are necessary, the customer will be notified. Rawlings cannot guarantee fit of sleeve stripe and sleeve TV number combinations when the combined height of the artwork is greater than 6". Fit of TV numbers and sleeve stripes varies per jersey size. Please ask your customer service or sales representative for assistance. Sleeve stripes on stock football jerseys will only cover half of the sleeve, not all the way around the sleeve.

PLACEMENT:

2" up from the bottom edge

FOOTBALL SLEEVE STRIPES WITH MASCOTS

PPMS1 • One Color Perma-Print® Mascot Sleeve Stripes PPMS2 • Two Color Perma-Print® Mascot Sleeve Stripes

See page 127 for more mascot options

All standard mascot sleeve stripes offered in 1 or 2 color with Pattern #2 sleeve stripes. Two color orders must be ordered as pictured with the top and bottom sleeve stripes and mascot as the first color and the middle stripe as the second color. If the design or color scheme is altered, the artwork will no longer be standard, but rather a custom order.

These drawings are for illustration purposes only. Rawlings® and its affiliates expressly disclaim any rights in these mascot drawings. The customer is solely responsible for obtaining permission or a license to use proprietary marks.

NOTE: All standard mascot sleeve stripes are available in the sleeve stripe Pattern #2 only. Different striping patterns require a separate pattern charge.

TRIM ORDERING DETAILS:

Trim striping patterns: For neck and arm trim specify colors working from the outer edge to the edge closest to the body of the garment. For side trim, specify colors to go from front to back.

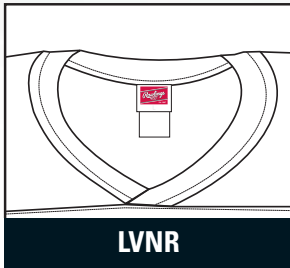

When ordering the CLSU option, specify colors from the sleeve to the jersey body.
Note: Rib knit not available on newer pro/lineman cuffs

KNEE – Add two small knee pads to any custom pant

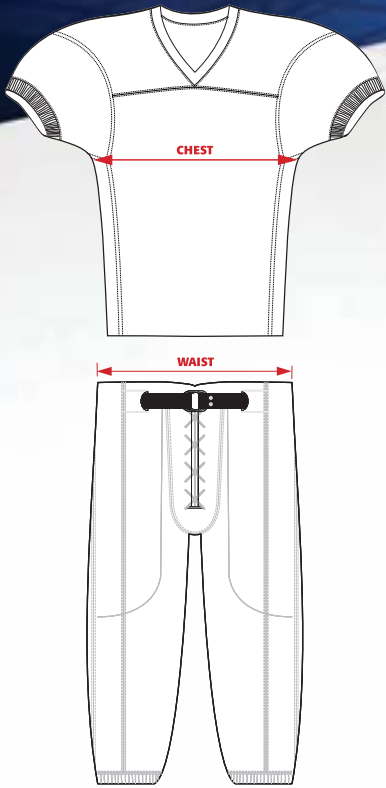

TPBG – Traditional Pocket Bag, available on any custom pant

PANT/SHORT OPTIONS

CB12

100 or 147 Cloth covered belt with D-ring (custom only)

HOW TO MEASURE:

Chest - The tape should be placed under the arms level across back muscles and chest. Have the person take a deep breath when reading the measurement.

Waist - The tape should be placed around the waist above the top of the hip bone. It should be positioned approximately where the person wears a belt.

NOTES:

1. Always use a cloth tailor's tape when taking body measurements. Place the index finger and middle finger between tape and body while holding the tape with thumb.
2. For circumference measurements of the body, the tape measure should not be pulled too tight.
3. For garment size, use the tape measurement to the next largest inch.
4. Garment sizing is determined from the actual body measurements. A specific size garment, e.g. size 42, is designed to fit a body with a chest measurement of 42".

The actual size of the pattern and garment will be determined by:

- a. Requirements of the sport (designed for loose or tight fit).
- b. Type of fabric intended for the garment design.
- c. Special garment styles or designs. When the above adjustments have been factored into the pattern, the garment should fit the proper size body as indicated on the size label of garment.
- d. The type and size of pads worn by the player

Rawlings® reserves the right to refuse to manufacture any order. The purchaser must maintain the right to reproduce, or have reproduced, proprietary or protected commercial property.

WASHING GUIDE

The following recommendations for cleaning and storing your uniforms will enhance the appearance of your team and extend the life of your garments.

LAUNDERING PREPARATION

- Garments should be washed separately before initial use.
- For best results and maximum wear, uniforms should be laundered immediately after each game, in cold water.
- The rinse cycle should likewise be set for cold water.
- Garments that cannot be cleaned promptly after wearing should be hung individually on rust-proof hangers or hooks. Perspiration fading may occur if wet garments are left in a pile.
- After a game, inspect uniforms for snags, tears, etc. and make repairs before washing to prevent further damage.
- Remove all contrast color items, such as belts, from garments before laundering and wash them separately.
- Before laundering a load of new uniforms, a sample garment should be washed according to care label instructions.
- Prior to washing, turning the garments inside out will help preserve the twill or perma-print lettering.
- We recommend a detergent similar to Tide® for cold water.
- Do not wash uniforms with other items, such as towels.

SOAKING

- Heavily soiled garments should be soaked in lukewarm water with a protein release agent for a maximum 45 minutes.
- Spray on products such as Spray'n Wash® or Shout® and leave on 15 minutes to absorb before washing.
- Products such as Stick Stain® or Shout Gel® can be rubbed on stubborn stains and left overnight for washing the next day as well.
- For blood stains, it is best to rinse in cold water as soon as possible, and if necessary, soak in cold water before washing. One of the above pre-treatments can also be used, or an oxygen based laundry booster such as Oxy Clean® can also be used for blood stains.
- An oxygen based laundry booster such as Oxy Clean® can also be used to eliminate odor.
- For ink stains, use hair spray. Simply spray on and rub until the ink is gone, then wash as normal.
- Immediately after soaking, garments should be run through a normal wash cycle.

MATCHING COLORS:

There is no known process which can positively regulate the final results when cotton, polyester or nylon yarns or cloth are dyed in both yarns and fabrics. Even though the finest dyes are used, each lot may absorb the color in a different manner and vary in shading when finished. Every possible effort is made to match colors as closely as the peculiarities in dyes and dye action will permit, but the situation is not

WASHING

- Do not overload washer.
- Do not wash white and colored garments together.
- All garments should be washed in cold water, 98° for blood stains. Rinse water temperature should not vary more than a few degrees from wash water temperature.
- Use a mild detergent (ph under 10.0) for washing uniforms.
- The water level in the washing machine should be kept high to hold down mechanical action. Only when uniforms are extremely soiled should the water level be lowered to increase mechanical action.
- Avoid overloading the machine as this causes shrinkage and impedes the cleaning process.
- Use an anti-static agent such as Bounce® Dryer Sheets, especially on garments to be tumble dried, to minimize lint attraction and spark discharge.

BLEACH

- Never use a chlorine bleach on any garments as it fades colors and weakens some materials.

DRYING

- For best results, garments (particularly those containing spandex) should be hung to drip dry.
- **Do not dry uniforms on high heat.**
- If you must use a dryer, use a damp dry or air dry setting. High heat can cause shrinkage, Perma-Print® ink to crack, twill to wrinkle etc.
- When tumble drying, use the lowest temperature or "air" setting. The uniforms will stick together, especially those with Perma-Print® ink.
- Remove garments promptly from dryer.

DRY CLEANING

- Do not dry clean any of your uniforms.

STORING

- Garments should be completely dry before storing.
- Store uniforms in a cool, dry area protected from sunlight and fluorescent light. This will prevent mildew and yellowing.

controllable. All orders are handled by us with the understanding that the purchaser realizes these conditions and accepts the responsibility for any variations within standard tolerances. Fabric of 100% polyester or polyester blends in dark shades contain dyes that may tint light colors of Perma-Print® ink. Rawlings® will not assume responsibility should this occur.
